

UNIQUE

DISCOVER YOUR FREEDOM
THROUGH TRAVEL

MOTORHOMES 2020
SEMI-INTEGRATED

VAN TI PLUS

KNAUS
FREIHEIT, DIE BEWEGT.

YOUR TRAVEL ADVANTAGE ON EVERY ROUTE

Here, we bring together what belongs together: In combination, the manoeuvrability of the KNAUS VAN TI and the automated chassis features of MAN TGE result in a unique motorhome meaning that your desire to travel has no limits. Whether breath-taking serpentine roads or bumpy gravel roads; whether travelling on snow-covered roads or in exotic oases. Drive wherever you want!

The garage door and service flaps are optionally equipped with central locking for even more comfort

1. INDIVIDUAL DRIVE CONCEPTS² & EURO 6D-TEMP MOTORISATION¹

Decide for yourself how you want to discover the world. The weight-saving front-wheel drive is part of the standard equipment but can optionally be replaced by a dynamic rear-wheel drive or traction-strong all-wheel drive. Thanks to the standard Euro 6d-Temp motorisation with AdBlue, nitrogen oxide emissions are reduced enormously and comply with current statutory regulations.

2. DUAL-CHANNEL AIR SUSPENSION¹

Optimised tracking, reduced swaying movements and improved handling in bends are achieved by the new dual-channel air suspension on the rear axle. This further increases driving comfort and safety.

3. WELL-ORGANISED BOARD ELECTRICS & SERVICE BOX¹

We made sure that everything is easily accessible when positioning the entire supply technology. As a result, you will find a clear area for the on-board electrical system in the rear garage with space for two powerful batteries. Thanks to the new charging booster, the body batteries are now charged particularly quickly and efficiently while the engine is running. Our proven ServiceBox combines all important functions and connections centrally in one place: From fresh water tank filling to a greywater drainage tap. Whether for servicing, maintenance or daily use: You never have to search or work for a long time here, but can quickly return to doing more enjoyable things.

4. VELOCATE GPS TRACKER²

If the worst comes to the worst, Velocate's optional GPS tracking system provides you with optimal protection. The tracking system requires very little power and can transmit for up to three months independently. Thanks to app control, it is particularly easy to operate. AGPS ensures particularly fast location determination and a sensitive GPS antenna provides the best reception for tracking even in difficult environments.

5. RESISTANT FIBREGLASS CONSTRUCTION¹

The underside of the floor as well as the garage floor are coated with particularly resistant fibreglass. Combined with the XPS insulation, the vehicle is optimally protected against the weather, stone impacts or similar, and it offers optimised insulation values. For you, this means: No cold feet and a particularly long-lasting vehicle quality. With a particularly high content of glass, the high-strength fibreglass roof offers the highest level of hail protection, giving you worry-free and quiet nights, even in bad weather.

6. DURABLE ALU-ALU SIDEWALLS¹

Elaborate aluminium sandwich structures make the entire vehicle construction more stable, more resistant against rotting, and extremely durable.

7. LEAK-PROOFNESS GUARANTEE¹

For all our leisure vehicles, we offer you a 10-year leak-proofness guarantee on the body manufactured by us as well as a 24-month guarantee from your KNAUS partner within the framework of our guarantee conditions valid at the time of vehicle delivery.

¹Range ²Options

It'll get you anywhere: Innovative driver assistance systems*

More safety. More driving pleasure. More efficiency. This is ensured by innovative driver assistance systems, most of which are standard equipment on the VAN TI PLUS. Optionally, you can choose exactly what you need for your dream holiday.

STANDARD EQUIPMENT

Start-stop system with braking energy recovery.

Use energy cleverly. This is optimally implemented using these two

technologies. The engine is automatically switched off when the vehicle is stationary. As soon as you operate the clutch again, the engine starts and uses the energy previously released during the braking process. How does it work? Through recuperation. The braking energy is stored in the battery and is then available to accelerate again. Simply brilliant.

Emergency brake assistant EBA.

Predictive driving is now even safer. The emergency brake assistant monitors the

traffic situation in front of your VAN TI PLUS and warns against too short intervals by braking automatically. Rear-end collisions can be avoided or mitigated in this way.

Multi-collision brake.

To prevent secondary accidents, the multi-collision brake ensures that the vehicle is stopped

immediately after the first impact. In the event of an accident, drivers are often unable to react to the situation immediately and bring their vehicle to a standstill, resulting in secondary accidents. This is where the multi-collision brake intervenes and prevents further damage.

ABS, ESP & hill-start assist.

The three musketeers of driving safety. ABS (anti-lock braking system) ensures

that the wheels do not lock in the event of emergency braking and that the vehicle can always be steered in an optimally controlled manner. The ESP (Electronic Stability Programme) is particularly useful during tight cornering, slowing down individual wheels to avoid breaking the bend. The hill start assistant guarantees precise starting even on steep slopes. This is a safety benefit, which will also be appreciated by the driver behind you.

Electromechanical power steering.

Power steering is now standard equipment in all vehicle classes. The electromechanical version

is a luxury trim detail which reduces fuel consumption while increasing safety. Unlike the hydraulic steering assistance, electromechanical power steering only needs energy if you actually steer. In addition, the driver's force input from the steering wheel can transmit important information to other driver assistance systems, thereby positively influencing both the parking process and accident prevention.

OPTIONAL DRIVER ASSISTANCE SYSTEMS & DRIVE CONCEPTS

With these clever additional options, you can customise your VAN TI PLUS to your individual preferences and requirements. Decide for yourself how you want to discover the world. The weight-saving front-wheel drive is part of the standard equipment but can optionally be replaced by a dynamic rear-wheel drive or traction-strong all-wheel drive.

Fog lights incl. turning light. In order for the road to be well lit even when turning, the fog lights have an additional light that radiates in exactly the direction in which you turn the vehicle.

Cruise control with speed limiter. You can easily set your preferred speed with the cruise control and automatically keep this constant for the vehicle. Ideal on long journeys on motorways and country roads. The speed limiter is particularly useful in

urban areas. You can for instance set it to 50 km/h once and you can be sure that you do not accelerate beyond the set speed until your switch it off.

Distance-regulated cruise control (ACC) with speed limiter. In addition to the benefits of cruise control and speed limiters, optional distance regulation is also available, as is known in the passenger car sector. This additionally includes the

distance to the vehicle ahead in cruise control, automatically corrects speed and keeps a safe distance.

Active lane departure warning system.

The active lane departure warning system helps you to always keep the vehicle in lane by means of electromechanical power steering. Unique in the motorhome sector, the lane departure warning system of MAN

TGE does not use the brakes, but regulates deviations using a correction in the steering gear and the power steering pump, as in the automotive sector. From a speed of 65 km/h, it switches on automatically and ensures that you do not get off track unintentionally.

Fatigue detection. Long stretches without breaks entail an increased risk of fatigue and accidents. To protect you from this, the fatigue detection system will alert you in appropriate situations, telling you to take a break or, even better, to change

the driver. The basis for this are certain steering patterns which indicate increased fatigue.

High-beam assistant "Light Assist". Never experience the unintentional glare of oncoming traffic again. The Light Assist automatically switches from a high to low beam during night driving when a vehicle approaches you.

Traffic sign recognition. Did the sign just say 100 or 120? Good to know that there is traffic sign recognition on board which can provide reliable support in such situations. A sensor monitors the signs on the roadside and sends you the corresponding information

directly to the cockpit display. In this way, the current maximum speed is always on display.

Hill start assist with hill descent control (only for 4x4). It usually gets really exciting once you are over the hill (the hill start assist has helped to prevent unintentional rollback on the slope). In order to also maximise vehicle stability during downhill driving and

on different surfaces, this assistance system controls the speed constantly. This allows you to concentrate optimally on the steering.

Rear-wheel drive. In many underground situations, driving on the rear axle has a positive effect on driving behaviour and may provide more traction.

4x4 optionally with 6-speed manual or 8-speed automatic transmission. Optimum traction on all surfaces and in every situation. Thanks to the perfect distribution of power to both axles, the 4-wheel drive system offers unique road holding of the vehicle in combination with maximum dynamics, whether with a manual or automatic transmission. Unique in the sector: Regardless which type of drive you choose, the standard and optional driver safety assistants are always on board in the VAN TI PLUS on MAN TGE.

Front-wheel drive is also optionally available with 8-speed automatic transmission. The more gears there are, the smaller the distance between the individual gears. This means a maximum reduction of the speed jumps between gears and the appropriate gear ratio for every driving situation. Thanks to the automatic transmission, you do not have to worry about being in the perfect gear, but can enjoy the ride.

*assistance systems protect within system limits.

Take everything with you & do not compromise on anything

Highest living comfort is the standard for KNAUS motorhomes. We have taken the level of interior design and detail solutions to a whole new level. So you do not have to do without anything, no matter where you go.

Brilliant! With just a few simple steps you can transform the comfortable lounge into 2 belt-secured seats in the direction of travel

1. EXCELLENT SLEEPING COMFORT ¹

30% lighter and 40% less loss of hardness than comparable cold foam mattresses. No development of 'hollows' even in one-sided use. The 5-zone EvoPore mattresses not only pamper you with excellent sleeping comfort, they also impress with exceptional durability. The High-Resilience-Climate technology ensures that the mattress remains highly elastic even under demanding climatic conditions. For even more exclusive sleeping comfort, the optional WaterGel layer is up to 50 mm thicker. The breathable foam adapts smoothly to the body. In combination with the textile side wall covering and cosy ambient lighting, you have the perfect basis for a restful night's sleep.

2. OPTIMIZED VIEWING AXES ¹

The smooth cab integration is not only a real eye-catcher from the outside. The homogeneous concept also ensures improved freedom of movement in the interior. The open view axes make the entire interior particularly bright and clear.

3. DIMMABLE AMBIENT LIGHTING ²

Roof cabinets, storage compartments, counter tops, wall units, canopies: wherever atmospheric light makes your holiday more beautiful, we rely on our integrated, dimmable ambient lighting.

4. MULTI-FUNCTIONAL LOUNGE ²

The comfortable L-shaped seating group in the VAN TI PLUS 700 LF can be transformed into 2 belt-secured seats in the direction of travel or a comfortable guest bed with just a few simple steps. So you always have the space you need.

5. NETWORKED ONBOARD ELECTRICAL SYSTEM ²

From lighting control to air conditioning and heating to water supply and battery management: Everything can be controlled centrally via our KNAUS smart CI thanks to the networked on-board electrical system. For you, this means: No long searching, but quick and easy adjustment according to your wishes.

6. PRACTICAL GAS BOTTLE PULL-OUT ²

For a particularly easy access and even faster exchange of the gas bottles we install a special pull-out. This is suitable for two 11 kg gas bottles and can be easily pulled out and securely locked inside.

Relaxation PLUS. After their long Trip, Cora and Tino are looking forward to jumping into the sea and then relaxing in their VAN TI PLUS 650 MEG.

VAN TI PLUS 650 MEG

VAN TI PLUS 700 LF

My tip

Jürgen Thaler, Product Manager
KNAUS Motorhomes

"The only thing that makes the VAN TI PLUS even better is the 4-wheel drive: it's worth it 100%. Of course, I have driven it myself and am totally thrilled. The fast, tight cornering, optimum traction even in snow and slippery conditions, and a unique driving experience speak for themselves. And all this is available at an unbeatable price."

290 cm

220 cm

from 699 to 747 cm

Optionally, the exclusive KNAUS 17" aluminum rims with distinctive design and genuine KNAUS DNA ensure a strong appearance

Networked onboard electrical system. If you opt for the optional EnergyPlus package, you'll also get the easy-to-use touch control panel. This allows you to centrally control and check all installed units: Light, all tank fillings and the battery capacity.

Living comfort PLUS. Sitting in the cosy seating area, Cora and Tino can talk about their many impressions of the trip. And immediately plan their next destination.

1 BENCH VAN TI PLUS 650 MEG

2 L-BENCH WITH SIDE SEAT VAN TI PLUS 700 LF

3 L-BENCH WITH SIDE SEAT VAN TI PLUS 700 LF

1. Bench 650 MEG. Thanks to ergonomic seat cushions and rotating cabin seats, you can spend comfortable hours here with two or four people.

2. Retractable TV. The TV can be easily retracted and extended. This ensures that it is safely stowed away during the journey.

3. Multifunctional Lounge 700 LF. The cosy L-shaped seating group offers plenty of space for company. An absolute highlight: it can optionally be converted into two additional belt-secured seats in the direction of travel. And if the guests want to stay overnight, a comfortable guest bed for two people is just as easy to create here.

Air cushions optimise the shape of the seat and back cushions & provide better support during the ride

The transition from the living area to the driver's cab is like one piece and thus provides a particularly harmonious overall picture

The single-column lifting table offers plenty of legroom. In addition, it can be moved particularly easy and far down for conversion into a guest bed

KITCHEN OVERVIEW

650 MEG Longitudinal kitchen
700 LF Corner kitchen

Enjoy PLUS. With this sophisticated kitchen, you will want to cook using all the spices of the world. Fortunately, Cora and Tino have bought a decent amount of supplies at the market.

- 1. Best room layout.** The well thought-out room concept creates a modern ambience. The opposite position of the refrigerator allows quick access.
- 2. Corner kitchen.** Each corner is optimally used here. For example for extra storage space, a particularly deep sink or a high-quality 3-flame cooker with cast iron grate.
- 3. High quality kitchen wall covering.** In the same decor as the worktop, it fits harmoniously into the overall picture and is easy to wipe off. There is room for spices and more in the integrated dovetail nests.

Dreaming PLUS. Cora and Tino can sleep well and dream of new destinations in the more than 2-metre-long single beds with super comfortable EvoPore HRC mattresses.

1. Wardrobe. The clever layout creates extra space for a full-length wardrobe. Thanks to several storage compartments and a clothes rail, you can stow everything comfortably here.

2. French bed. Perfectly integrated in the rear and with a pleasant soft-touch wall panelling, you will find a restful night's sleep here.

3. Guest bed. The lounge can easily be converted into a comfortable guest bed. Lower the single-column lift table, insert the cushions and relax.

FUNCTIONAL & STYLISH: OUR SEAT CUSHIONS

Design the interior of your VAN TI PLUS individually with our varied upholstery and fabric options. Our ACTIVE LINE upholstery features reliable stain protection whilst also being water- and oil-repellent. Do you have to go outside to enjoy a glass of red wine? Sure, if you wish. However, that shouldn't be because you're worried about staining the furniture.

FABRIC OPTIONS

Standard fabrics all convince with durable materials and an attractive design that matches the respective furniture decor.

- + Antiallergic, breathable & skin-friendly
- + Tested for high colour fastness
- + Durable and easy to clean

ACTIVE LINE fabrics are extremely easy to clean. Liquids do not seep in immediately and most stains can be removed with a damp cloth.

- + Antibacterial
- + Lotus blossom effect
- + Breathable
- + Water & oil repellent
- + Care protection

ERGONOMIC SEATING COMFORT

The seat cushions support the natural S-shape of the spine. This is how you start your holiday relaxed & not with back pain

No matter which fabrics and upholstery you choose, you can always rely on one thing: **optimised seating comfort** is part of the basic equipment. Our top priority is to **ensure that you arrive relaxed everywhere**. That's why we use ergonomic seat cushions that optimally support your back and can also help you maintain a **healthy posture** during long journeys and excessive family meals.

COZY HOME-PACKAGE

Enhance your motorhome with a COZY HOME package. From fresh to classic, there is something for every taste. Each package contains two large (60 x 40cm) and two small (40 x 40cm) pillows with feather filling, as well as a matching table runner and two soft blankets.

The information on the delivery contents, measurements and weights as well as the appearance correspond to the knowledge at the time of printing (07/2019). We reserve the right to make changes on equipment, technical data, serial equipment and prices. After a contract has been concluded, we reserve the right to make technical changes within the framework of the construction insofar as they serve technical progress and are acceptable for the customer. Minor colour and texture deviations are also reserved - even after conclusion of the contract - insofar as these cannot be avoided due to the material (e.g. colour deviations of up to approx. 2.0 dE between paint on sheet metal and paint on GRP/plastic) and are reasonable for the customer. Some of the illustrations show optional equipment that is available at an extra charge or equipment features of prototypes/studies that do not conform to the serial status and in some cases will not be available as optional equipment. Colour deviations are print-technically possible. Therefore, before purchasing a vehicle, please seek comprehensive advice on the current status of the series from an authorised dealer. The decoration shown in the catalogue is not part of the equipment supplied. Please also note the comments in the current price list, in particular on weights, payload options and tolerances. Reprinting, even in extracts, is only permitted with the prior written permission of Knaus Tabbert GmbH. We reserve the right to change content at our discretion.
