WELL-EQUIPPED AS STANDARD

A TABBERT is equipped with everything that makes your holiday almost perfect right from the start. And that is all available as standard! From sophisticated safety technology to practical furnishing and equipment components to comfortable feel-good features – at TABBERT, features only available as expensive options with other manufacturers are included as standard. And if you have special wishes, our price list contains additional optional solutions for your dream on wheels.

UNMISTAKABLY STYLISH DOWN TO THE LAST DETAIL

Finally you have arrived at the destination of your dreams. Lean back and let the skilful interplay of design and functionality have an effect on you. In a TABBERT, style and sense enter into an extraordinary symbiosis. Dynamic lines, strong character forms and high-quality material compositions are the unmistakable signature of every TABBERT. Your mobile home is a tasteful living space of the highest quality and functionality, no matter where you look.

THE SOUND OF SILENCE

The patented TABBERT roof impresses with a range of important benefits. Probably the most important of these is its exceptional noise insulation: The difference between a normal, sandwich pressed standard roof and the 58 millimetre TABBERT design, which is almost twice as thick, goes beyond just the extra stability. In a downpour or hailstorm, the noise level is reduced by up to 9 decibels or more, making it around 1.5 times quieter. In other words, you can sleep through a night-time downpour practically undisturbed. And this is just one of many reasons why seasoned campers insist on a TABBERT.

HIGHLY RECOMMENDED AT ANY TIME OF THE YEAR

Clear winter nights or bright sunshine? Holidays with a caravan are truly diverse and your TABBERT provides a pleasant indoor climate at any temperature. Thanks to the excellent insulation of the caravan body and the innovative air-conditioning technology, your TABBERT awaits you with cosy warmth in winter and keeps the interior cool longer on warm summer days.

TECHNOLOGY YOU CAN RELY ON

It is protection and safety that make a TABBERT our home. A feeling that you can take with you on your journey at any time! Because we equip each of our models as standard with a multiple award-winning and comprehensive safety package – from the chassis to the body to the interior. In this way, we give you the certainty of reaching your destination reliably and safely and enjoying carefree holidays.

ALL INFORMATION ABOUT
SAFETY IS AVAILABLE ON PAGE 130

SHAKEN FOR 10,000 KM – BUT NOTHING HAS MOVED

To ensure that you enjoy your TABBERT for many years, we set the strictest standards for materials and workmanship. This is just one of the many reasons why you will still encounter our models from the 1970s on your travels. That is because a TABBERT lasts a lifetime. We work to ensure this with carefully selected and extremely demanding test procedures and simulations. We deliberately seek out the most challenging road surfaces, the longest routes and circuits to test our vehicles under the most adverse conditions and at high driving speeds. You can rely on it – for over 65 years and for the most beautiful moments in life.

Making the best even better and building a caravan that is beyond comparison! Under these circumstances, the new CELLINI has become a masterpiece and milestone in caravan construction. The new flagship of the TABBERT fleet combines craftsmanship and engineering at the highest level and redefines the luxury class. The automotive exterior already impresses with its distinctive, sporty rear, which flows into an aerodynamic, low-slung spoiler. The metal alloy shunting bar with backlit CELLINI lettering proudly frames the masculine status symbol. Modern LED broadband rear lights underline the design claim of the CELLINI.

WELCOME TO THE LIMIT

The sweeping lines and three-dimensional design of the CELLINI break through the boundaries of traditional caravan construction and characterise the unmistakable appearance of this luxury caravan. The impressive front window with smooth transition into the automotive substructure of the front skilfully takes up the impressive back of the vehicle. And while the unique slide-out will attract everybody's attention on the campsite, you can look forward to a multitude of ground-breaking innovations inside the caravan liner. Because what you have only dreamed about so far will be uncompromisingly exceeded.

EXPRESSION OF PERSONALITY

Exclusivity and sophisticated design – that’s the 5-star luxury you desire. As a slide-out version with a kitchen and sleeping area that can be moved to the outside, your mobile VIP suite welcomes you with an overwhelming feeling of space. The finest materials, noble decors with a real wood look and a furnishing concept well-conceived down to the last detail completely redefine caravanning. The CELLINI lighting elements integrated harmoniously into the furniture are particularly impressive. The ambient lighting shines softly from the ceiling. Indirectly illuminated wall unit flaps and pull-outs spread a soft shimmer. The extravagant illuminated canopy above the door is significantly more eye-catching and, in combination with the matching LED reading spots in TABBERT design, creates a presidential atmosphere in the CELLINI.

COMFORT WITH LUXURY EFFECT

The feudal CELLINI Lounge combines maximum seating comfort with a multitude of intelligent functions to adapt to your needs as you wish. Lean back and enjoy the yacht-like feeling while you enjoy a nice drink at the bar table, which can be folded out of the middle backrest. If necessary, pull the headrests a little higher or change the firmness of the upholstery. By now, you'll have realised: the CELLINI is exactly what you deserve.

A novel design of the handle edges and recessed LED light strips on the wall units reinforce the haptic dimension of the CELLINI furniture

High back or relaxing lounger? The height-adjustable headrests of the CELLINI genuine-leather seating group make it comfortable for you in any position.

At the touch of a button, you can change the degree of hardness of the seat cushions in the CELLINI seating group.

CELLINI

NEW

FOR THOSE WHO ENJOY MAXIMUM TASTE

Little snack or big five-course dinner? The kitchen of the CELLINI also serves up an optimal combination of elegant design, furniture concepts with a love of detail, and technical sophistication. Especially the generous working and storage surfaces in the slide-out, with double sink and 3-flam cooker ensure real enjoyment, even when preparing food. The six illuminated, fully extendable drawers can accommodate everything that is important to the pampered palate. The illuminated shelf is the perfect place to display the most important things. Decorative as well as useful utensils still find a harmoniously integrated spot.

CELLINI 750 HTD
SLIDE-OUT

The large work surface of the CELLINI Slide-Out offers plenty of space for electrical devices and has the necessary sockets placed in a retractable column.

A double sink made of stainless steel with an elegant chrome fitting, recessed into the worktop, helps with cleaning, draining and washing vegetables.

The refrigerator with double opening opposite the kitchenette is easily accessible from both sides.

When not in use, the sink serves as an extended work surface thanks to its cover in natural stone look. Pots, crockery and cutlery – all of this and more finds plenty of room in the handle-less CELLINI drawers with ergonomically shaped, LED-lit hollow mouldings.

EXCLUSIVE BED CHAMBER

A perfectly staged private retreat, where you can leave the day behind, awaits you in the royal sleeping area of the CELLINI. Whether bevelled or flat – the comfortable CELLINI Slide-Out queen-sized bed with adjustable headboard lets you take in the luxurious dimensions of the royal vehicle. Meanwhile, a separately illuminated, leather-covered bedroom wall and the ambient lighting shimmering from the upper edges of the furniture certainly put the amazing room in the right light.

LUXURIOUS WELLNESS BATH

In their search for fresh ideas, CELLINI owners are not only inspired by the spaciousness and comfortable furnishings of their bathroom flooded with natural light, they are also enamoured with the luxurious wellness oasis that has been designed down to the very last intricate detail. Large lift-tilt roof hood (HeKi skylight) for natural light and concealed LED lighting underline the upscale ambience. An additional light panel in the characteristic CELLINI design outshines the wash basin with chrome sink and fittings. Therefore, the glamorous ensemble becomes a unique interplay of high-quality designer pieces, which one would perhaps come across in a hotel suite.

+ CELLINI HIGHLIGHTS

- + Front and rear in LFI technology
- + Unique feeling of space due to slide-out
- + Rear garage with central access to electricity and city water connection
- + CELLINI Smart Home Technology
- + Standard Truma air conditioning system
- + Lighting concept harmoniously integrated into the furnishings
- + Individually adjustable, multifunctional, genuine-leather seating group
- + Underbody concept: Functional floor with underfloor shells

Expressive: the exterior design underlines the dynamic, self-conscious profile of the CELLINI.

Automatic switchover into night mode: An exceptionally smart innovation in the new CELLINI models is the ability to control and monitor selected on-board technology via voice control. Just like in the smart home, lighting or heating, for example, obey the commands of the owner. For more information on voice control, see page 125.

The striking metal alloy shunting bar is provided with a CELLINI lettering, which illuminates the automotive designed rear of the vehicle when standing.

On hot days, you can always keep a cool head thanks to the air conditioning, which comes as standard. The air is efficiently distributed and dehumidified at the same time – a pleasant side effect!

The rear luggage compartment is more than just a simple caravan stowage box: it also houses electricity and city water connections, which means that the side walls are designed cold bridge-optimised and without openings.

The two control panels above the CELLINI door allow you to control room temperature and hot water, as well as the main switch, water pump and filling levels.

The faceted light canopy above the door and glass cabinet illuminates the happenings. The standard 24-inch flat-screen TV in the CELLINI Lounge provides a highly visible TV entertainment experience.

BRILLIANT DESIGN FOR THE PREMIUM CLASS

You've never been so close to seventh heaven! With its innovative interior design, the PUCCINI 2020 is the pioneer of a newly defined feel-good premium class. Thanks to its unusual lighting concept as a defining stylistic device of interior architecture, the new star in the caravanning sky presents itself as an icon of exclusive comfort and lifestyle home design. A shining example in the premium segment.

A STAR AMONGST STARS

Arrive and feel at home. The skilful use of light as a design instrument gives the PUCCINI a breathtaking atmosphere. Indirectly illuminated, elegantly curved wall units and the surrounding ambient lighting provide a successful contrast to the fascinating light canopy at the door. Seamlessly adapted: the glossy black refrigerator with double opening, making access from the outside and inside possible.

PUCCINI

NEW

PUCCINI 550 E

TASTE ISSUES NEWLY INTERPRETED

The new PUCCINI is a shining example of the luxury class and meets the highest demands in terms of comfort, design and technology. Make yourself at home in the stylish, spacious round seating area and enjoy the atmospheric lighting of the kitchen bar: the carefully arranged ensemble with 3-flame cooker and sink in front of an acrylic glass panelling in PUCCINI signature design is a real feast for the eyes. Practical details such as a fold-down mini counter and fully extendable drawers also make cooking itself a pleasure.

The mini counter next to the sink serves as an additional and practical storage area.

With its outstanding design, the kitchen back wall reflects the PUCCINI design. The fully extendable drawers under the well thought-out kitchen appliances offer plenty of space for all kitchen utensils.

WONDERFUL IDEAS FOR BEAUTIFUL DAYS

Whether bathroom or sleeping area, the PUCCINI has thought of everything that contributes to your relaxation. The 93-cm wide single beds offer plenty of space to rest. The elegantly backlit mirror on the rear wall creates a cosy twilight atmosphere and the standard electric floor heating ensures comfortably warm feet. Equally sophisticated is the perfectly equipped bathroom with a large mirror cabinet, an elegant washstand and many other conveniences to meet sophisticated demands.

PUCCINI 550 E

PUCCINI 550 E

The stylish modern bathroom of the PUCCINI inspires with its indirectly illuminated, divided mirror cabinet. Intelligently partitioned cabinets and fold-out mirror elements offer plenty of storage space as well as useful shelves in the middle of the beautiful bathroom.

Well thought-out down to the last detail: the bedside lockers behind the head ends of the beds offer additional storage space, adjustable reading spots, and additional power connections.

+ PUCCINI HIGHLIGHTS

- + Exclusive lighting design in the new luxury feel-good space concept
- + Electric floor heating as standard
- + 93 cm wide single beds (depending on layout)
- + Truma iNet-controlled Combi 6 heater
- + Extra-wide entrance door with canopy
- + Exclusive TV solutions
- + Additional sockets in the bedroom and at the seating area

The exterior design of the PUCCINI is also part of the dynamic TABBERT line.
The extra gloss? The silver fender inlays in the vehicle's front.

The TABBERT emblem has served as a design model for the new lighting design. Its diamond pattern became the signature element of the luxury caravan.

The ingenious living room furniture combination at the entrance door connects the extravagant light canopy **1** with the refrigerator **2** accessible from both sides located beneath. The furniture flap at the top **3** is designed to accommodate a television, which can be turned towards the living or sleeping area thanks to the swivel arm. Underneath the slightly illuminated shelf **4**, an apothecary drawer with soft-close function **5** offers a surprising amount of space.

Additional sockets in the round seating group cover the increased power demand from smartphones and other electronic devices.

A glance into the wall units reveals plenty of storage space, a protective vibrating edge and adjustable shelves.

With the new single-bed layouts of the PUCCINI, we have succeeded in demonstrating even more generosity in terms of space. With stately 93 cm, the beds are significantly wider than usual and greatly increase the already high level of TABBERT sleeping comfort.

LAYOUTS AND BENEFITS

- + 153 l refrigerator
- + Entrance door 700 mm

LIFE AND STYLE PERFECTLY COMBINED

The entire life as an experience. Those who decide upon a VIVALDI also transfer their demands on a modern home to their holiday home. The combination of modern straightforwardness with precise and dynamic highlights give the completely redesigned interior of the caravan a confident appearance. The lifestyle-oriented interior furnishings include a refrigerator cleverly positioned at the entrance. The secret: the refrigerator door can be opened from both sides! Refreshing drinks can be grabbed from the outside, without having to enter the caravan. There are also many more neat features in the new VIVALDI.

THE NEW VIVALDI THE FIRST HOME ON WHEELS

Inspired by the modern Bauhaus style, the form and colour contrasts of the VIVALDI furnishings convey an individual and yet relaxing feel-good atmosphere. This is particularly the case when the indirect lighting falls on the curved edges and straight block forms and the materials come into effect. Brilliant white and light nut wood reflect the brilliant chrome and high-gloss surfaces. Warm grey tones and graphite strengthen the fancy lounge character in the interior, which is highlighted by the spacious seating area.

READY FOR NEW EXPERIENCES

Like living in a loft. The interior design of the VIVALDI impresses its guests with seamless transitions from functional furnishings to lifestyle design. Tastefully upholstered and constructed in a premium way, the very relaxing round seating area will also convince (new) pioneers from this modern form of TABBERT caravanning. Thanks to the light interior and lots of daylight, it feels as if you've brought nature inside.

VIVALDI

VIVALDI 550 E 2,3

VIVALDI 550 E 2,3

Do you want some refreshment? It doesn't matter whether you want to access the refrigerator from the inside or the outside, the refrigerator-freezer combination in the VIVALDI is located at the entrance door and can be, thanks to the very efficient double opening hinge technology, accessed from both sides.

VIVALDI 550 E 2,3

VIVALDI 550 E 2,3

VIVALDI 550 E 2,3

VIVALDI 550 E 2,3

SEEING WHAT YOU WANT, HAVING WHAT YOU NEED

The judicious design of the areas in the new VIVALDI integrate what's behind it. The 3-flame cooker and the stainless steel sink are, for example, flush and are integrated seamlessly into the fully-equipped kitchen and have a colour-matched edge. When not in use, the kitchen bar appears to be more of a stylish sideboard with its silver piping and metal handles on the drawers. Even the transition from the kitchen unit to the rear wall follows the stringent surface design. The window, which is recessed into the wall, allows lots of natural light on the natural stone design. At night, the light strips in the cabinets are illuminated, providing the right amount of ambience for the appetising ensemble.

VIVALDI 550 E 2,3

SELECT WHAT YOU LIKE

With its generous side windows and the large skylight, night owls can count stars instead of sheep in the rear of the VIVALDI. Surrounded by an interior design that is flooded in atmospheric lighting, going to bed becomes another holiday highlight. Regardless of whether you want to share your bed or enjoy your single bed as a sleep soloist, here you will find luxurious silence – in particular if you have chosen the optional TABBERT comfort sleep system with water gel layers.

DIVE INTO THE WELLNESS LOUNGE

Whether foam, lotion or fragrance, the bathroom is the place where you can pamper yourself every day. Especially on holiday! For this reason, the new loft-airy VIVALDI design concept with its modern use of materials and the optimally aligned illumination also transfers the luxurious feeling of freedom.

VIVALDI 550 E 2,3

+ VIVALDI HIGHLIGHTS

- + Modern interior design in Bauhaus style
- + 700 mm entrance door (depending on the layout) for easier access to the vehicle
- + Combination heating system with smartphone control via the TRUMA iNet System
- + A 153 litre refrigerator with separate freezer that is also accessible from the outside
- + Apothecary pull-out with additional storage space

Clear lines, an aerodynamic design with sporty-elegant fenders with silver inlays give the VIVALDI a self-confident look.

Easy entry: 700 mm wide comfort entrance door (depending on the layout).

Due to the lightweight and quietly gliding partition sliding door, you can sleep peacefully. On cold days, the inside of the trailer will stay cosy and warm and no energy is lost into the vacant sleeping area.

Raised ventilation shafts ensure a good room climate and prevent dirt from getting into the opening.

The new 32" LED TV.

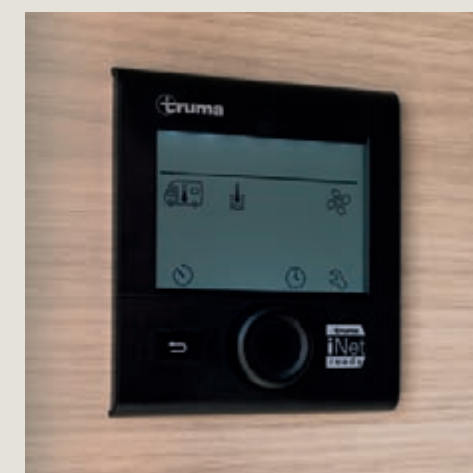

Hidden and indirect: The new LED illumination concept bathes the living room in a cosy and relaxing atmosphere.

The spots adjusted to the VIVALDI upstyling illuminate the sleeping and seating area for a relaxing evening of reading.

The pull-out insect screen disappears almost soundlessly within the frame of the door and does not need any additional space in the entrance way.

The Truma iNet System enables temperature regulation by smartphone and, if desired, it will also display the gas fill level.

LAYOUTS AND BENEFITS

- + Single beds
- + Spacious seating area
- + Refrigerator at entrance (also accessible from the outside)
- + Open lines of sight

- + Large round seating group
- + Wardrobe for clothes and laundry

UPGRADE

PEP_{by} TABBERT

Summer, friends, sunshine and the freedom to go outside without thinking that much – that is what it's like being on holiday with your PEP. The feisty PEP is casual and colourful, but of course still relies on solid TABBERT qualities. The lively graphics combine traditional craftsmanship with sophisticated technology. It is therefore worth looking closely at the caravan which is supposedly breaking ranks in the TABBERT series.

PEP 540 E 2,3

PEP IS LIKE SAMBA AND SUNBATHING

Warm lighting, friendly design, and one or the other unique decorative piece. The ingredients for the southern-spicy PEP cocktail will ignite your wanderlust. Simply choose one of three upbeat fabric worlds, e.g. the fiery "Berry Red", and your TABBERT will match your personal holiday mood. What you might also need for your perfect summer feeling can be stored in the spacious cabinets and storage compartments.

PEP 540 E 2,3

PEP IS THE CHAMPION FOR CHILLING OUT

Finally arriving, unwinding and allowing your gaze to wander. With its combination of Southern European flair and luxurious furnishings, the PEP invites you to enjoy 100% relaxation. For an enjoyable midday break, simply pull out the additional cushion of the comfortable round seating group and put your feet up. Now take the fruit punch glass in the one hand and your mobile phone in the other and you'll be enjoying the perfect holiday ... or do you prefer a Pina Colada that matches the furniture?

PEP TASTES LIKE SALSA AND CERVEZA

And when the stomach starts to rumble, the 3-flame cooker in the kitchen can demonstrate its fiery character. Even here there is a colourful mixture of lively design and technical balance. The highlight colours of the peppy Latino define the spacious overhead cupboards and the wide drawers with their soft-close function. On the TABBERT bar counter (depending on the layout), you'll find room for a few tapas. And the large refrigerator is also made to order for having a small fiesta.

PEP 540 E 2,3

PEP 540 E 2,3

PEP IS LIKE RELAXING AT THE BEACH

Whether you want to take a short nap or sleep in – you'll get a good night's sleep on the beds equipped with cold-foam mattresses. Thanks to the double-sided window in the rear, you can enjoy the cool breeze and perhaps even enjoy listening to the sound of the sea. New energy is also guaranteed when refreshing with cold water: The extensively equipped bathroom with its recurring PEP colour worlds really puts you in a good mood.

Wish list: the stylish bedroom wall in the front is indirectly illuminated and in upholstery colour.

PEP 490 TD 2,3

PEP 540 E 2,3

Good night two times: in the spacious double bed.

Two into one: the roller slatted frame function.

PEP 540 E 2,3

+ PEP HIGHLIGHTS

- + 2 furniture worlds to choose from
- + 2 exterior designs to choose from
- + Comprehensive standard equipment

Design variant **RED**

Design variant **MINT**

Batteries always charged: Thanks to the USB port underneath the TV.

Nice and practical: the transparent countertop for more storage surface.

Hot combination: the practical PEP kitchen with fronts in white (Berry Red upholstery)

Standard instead of optional extra: Flyscreen door keeps insects out.

Find what you are looking for: illuminated shelves underneath the upper compartments.

Quite bright: modern highlights along the kitchen canopy and ceiling light with LED technology

Keeping you informed as standard: Fresh water tank display.

A FAMILY HOLIDAY WITH A FEELING OF HOME

Playing, swimming, hiking, sightseeing, reading, camp fire – in a camping holiday there is something for everyone in the family. This also applies to the generously extended DA VINCI range, which is equipped with lots of useful details. It has four family-friendly layouts for up to eight people. And while the little ones just enjoy the great outdoors, the DA VINCI offers adults the luxury of a stylish retreat.

DA VINCI

A SIGHT AS BEAUTIFUL AS THE VIEW

Distant landscapes, blue sky and fascinating colours make the heart of every camper beat a little faster. In the DA VINCI, however, you don't necessarily have to gaze out of the windows. All the more if you value top-quality workmanship and stylish design. Take for example the elegant shape of the overhead cupboards in "Noce Opera" with bright leather-feel applications. Or the classy glass cabinet next to the entrance. In the DA VINCI, everyone will find their favourite spot.

DA VINCI 490 TD

DA VINCI 490 TD

TURNING COOKING INTO A PLEASURE FOR THE SENSES

Freshly picked basil spreads its unique aroma. A tasty treat for the entire family is quickly prepared. The attractive yet durable worktop provides all the space you need. Especially with the elegant smoked glass cover that transforms the cooker combination into an additional work surface. Naturally, you will also find an easy-to-clean stainless steel sink complete with designer fittings and a family-friendly 148-litre refrigerator. Bon appetit!

HOME IS ANYWHERE WHERE YOU ENJOY BEING

A minute ago it was a cosy nook in which to enjoy a little snack between meals. Now it is transformed into a circular seating area for a game of Monopoly with five players. The lifting table on its central support column can be raised to playing height in a matter of seconds. With one of four new upholstery worlds available in the DA VINCI in matched textile or synthetic leather nuances, you also have a personal touch. The extra-high TABBERT typical backrests guarantee comfortable seating, while at the same time helping to keep the air out! And when it gets late, the optional ambient lighting bathes your DA VINCI in soothing warm light.

Smart: The table extension creates space for 5 persons (depending on layout).

DA VINCI 540 DM

THOSE WHO ARE WIDE AWAKE MUST HAVE ENJOYED A GREAT NIGHT'S SLEEP

It's wonderful when you can look forward to spending an entire sunny day with the children. The energy required is accumulated during a restful night's sleep and activated with a refreshing shower.

With excellent fittings including a large mirror and cupboards with a clever arrangement system, everyone wants to be the first in the bathroom. Of course, the practical shelves are fitted with non-slip strips to keep everything in place throughout the journey. The frosted glass window is another clever touch. It provides privacy while letting in plenty of fresh air and natural light.

DA VINCI 490 TD

DA VINCI 490 TD

A DA VINCI spoils you with 5-zone cold foam mattresses included as standard. The rubber-mounted slatted frame features height adjustment in the foot and head area. The optional comfort sleep system satisfies every requirement. This is the most relaxing way to start the day. A good thing too, as the children are already ready for action.

+ DA VINCI HIGHLIGHTS

- + Lots of family layouts featuring up to 8 places to sleep
- + TABBERT GRP roof
- + More power due to 400 watt converter
- + Premium equipment at an attractive price FINEST EDITION

The L-shaped kitchen with two ergonomically optimised working heights offers plenty of space and all the conveniences you enjoy at home. The aesthetically curved kitchen canopy with spot lighting rounds out the accomplished kitchen design.

Solid wood edges protect areas exposed to knocks and bumps. Lasting value is a TABBERT principle.

Two-tone furniture décor with its tasteful chrome moulding and a special surface coating impart the sophisticated atmosphere of the luxury class.

The stylish glass cabinet in the entrance area (depending on layout) is an impressive feature.

FINEST EDITION

HOME-FIELD ADVANTAGE DA VINCI FINEST EDITION

The DA VINCI's special version comes factory-fitted with its fans' most popular upgrades, including the coveted Comfort Sleeping System, ambient lighting and LED-TV. On the exterior, the FINEST EDITION scores above all with smooth sheet metal and light alloy rims as well as with an awning light that reacts to movement as well as the illuminated, dimmable awning strip.

The patented TABBERT roof combines optimum air circulation and temperature insulation with excellent noise damping. Naturally, with a hail-resistant GRP roof.

LAYOUTS AND BENEFITS

THE ENTRY MODEL FOR THOSE WHO WANT MORE

Finally get away, experience nature, discover other countries, or find new friends. If you do not want to miss the feeling of being at home, you will find an ideal companion in the new ROSSINI. Because the entry model in the TABBERT premium range experienced a complete upgrade, which not only affects the new dynamic and elegant exterior optics, but above all the feeling of home in the interior. And the advanced safety technology of the new ROSSINI also contributes decisively to well-being. Regardless of where you are.

SIMPLY MORE SPACE FOR
HOLIDAYS
IN XL

It is always nice to come home after a long day. Especially if you come home to the great feeling of a TABBERT space. The trick lies in the open views that result from the intelligent expansion of the interior. In the new ROSSINI, the even larger round seating areas and the greater amount of space are impressive – especially in the new family layouts, which have two wardrobes or an additional wash-basin (depending on layout).

ROSSINI

ROSSINI 540 E

COSY COMFORT VERY BIG

Whether it is morning meeting, a quick drink or social gathering - everyone can find their place in the ROSSINI round seating group with their ergonomically shaped seat elements. Four new upholstery designs enhance the individual feeling of living, and the shelves and cupboards offer plenty of space for practical and personal use. The new furniture decor "Olmo Pavarotti" and the furniture handles made of stainless steel convey a tidy, harmonious ambience.

BRIGHT IDEAS FOR A GREATER SENSE OF HOME

Of course, the can of ravioli will do, if it has to be quick. But the smart and well-designed new ROSSINI kitchen, thanks to a modern, 3-flame cooker combination with electric ignition and solid cast iron, also allows you to devote yourself to more sophisticated creations. If the kitchen remains cold, the clean glass cover creates a seamless transition to the equally generous and robust working surface.

ROSSINI 620 DM

The gas cooker is easy to operate thanks to electric ignition.

ROSSINI 620 DM

LYING SO PLEASANTLY AND COMFORTABLY

With the slogan “Precisely the right thing for everyone”, the cleverly equipped ROSSINI series, with its broad range of layouts, appeals to the needs of many holidaymakers. On the spaciouly designed single beds located in the light-flooded front of the vehicle, everyone will find their favourite side. Your personal belongings can be stored in the spacious wall-mounted cabinets in the sleeping area. Slide guards are attached to the shelves in the headboard area to keep your personal things right where you want them.

ROSSINI 540 E

ROSSINI 620 DM

ME HERE, YOU THERE – SHARE AND DIVIDE WITH SENSE OF PROPORTION

The ROSSINI family layout provides both children and adults with the desired level of privacy: simply close the partition and you’ll quickly feel as if you are within the comforts of your own home. It therefore helps that you can keep a few personal items around, too. Cold-foam mattresses in the fixed beds provide even more beautiful good-night-story moments.

ROSSINI

BREATHLESS THROUGH THE DAY, DREAMLIKE THROUGH THE NIGHT

In general, children love the cuddly togetherness in their mobile apartment. In the new ROSSINI, they can create their own realm from their own beds. The spacious floor-mounted fixed beds can be quickly converted into a separate seating group or, if the garage door is open, can be used as a pass window.

ROSSINI 620 DM

ROSSINI 620 DM

A WELL-ORGANISED BATHROOM

No matter how many toothbrushes you have to store in the bathroom, there is ample room for a fun morning ritual in every ROSSINI. Whether on the stylish, full-timbered washbasin with high-quality designer fittings or in the separate shower and toilet area. Plenty of warm water thanks both to the large 45-litre water tank and a Truma Therme, while the low-noise circulating heating ensures morning warmth.

- + Fixed beds with 5-zone cold-foam mattress
- + Slatted frame, tilting, with gas-charged shock absorber
- + Storage shelf in bed area (depending on layout)
- + Storage hatch in the bench side wall in the entrance area
- + 2-door cabinet in front/rear toilet cubicle
- + Safetylock closure for ceiling-mounted kitchen cupboard
- + Smoke detector

4. KITCHEN AND SANITARY AREA

- + Dometic refrigerator (gas or 12 V¹ or 230 V), with integrated light and freezer compartment (gas operation en route permitted only in combination with Mono or DualControl)
- + 3--flame cooker with electric ignition, cast grid and glass cover
- + Stainless steel sink
- + Automatic mixer taps in kitchen and washroom
- + Apothecary pull-out with large drawers and soft-close slides (depending on layout)
- + Ceiling cupboard with mirror and storage space in the washroom (depending on layout)
- + 12 V lighting
- + Thetford bank toilet
- + Toilet shaft seal

5. POWER SUPPLY

- + 13-pole connector system “Jäger” (ISO 11446)
- + Halogen and LED recessed spots (power saving, long life)
- + Flicker-free 10 W reading spots (long life, no brightness fluctuations), position adjustable
- + Optimized voltage supply (constant brightness in changeable lighting conditions, no flickering, no voltage fluctuations, silent operation)
- + TV-ready (areal connection, satellite cable in place)
- + Converter/switching power supply, 350 Watt
- + Wardrobe lighting
- + GPS tracker

6. GAS/WATER/HEATING

- + Convection gas heater
- + Hot water supply (in kitchen and toilet with Truma Therme)
- + Fresh water tank, 45 liters, permanently installed, internal and external filling option, cleaning opening
- + Water lines routed alongside air recirculation hose
- + “BWT – Best-Camp mini” water filter system

¹ 12 V operation from 148 l refrigerators are not possible!

* For caravans made by TABBERT, we grant you a 10-year leak-proofness guarantee on the body manufactured by us in addition to your compulsory guarantee within the framework of our guarantee conditions.

UPHOLSTERY

Whether sound in tone or contrast, fabric or synthetic leather – you can personalise your ROSSINI according to your personal taste.

* Option available at extra cost

WHAT DEFINES TABBERT

5 For over 65 years, TABBERT has stood for sophisticated, premium caravans – for good reason! Because these five core competences characterise every idea, every technical development and every process in our company:

At the “Customer is King (König Kunde)” awards, for example, TABBERT models were repeatedly honoured for their exclusivity, diverse innovations, and the highest safety standards. Above all, due to its extensive basic equipment, TABBERT caravans have repeatedly been among the winners of prestigious national and international awards and customer surveys.

DESIGN FOR LIFE

106

The captivating charisma of a TABBERT is determined through creative ability, precision craftsmanship, and a distinct sense of zeitgeist.

INNOVATION AS A PRINCIPLE

118

Pioneering spirit is part of our DNA – always one step ahead. TABBERT has been setting standards continuously for over 65 years.

FEEL-GOOD CLIMATE

126

With diverse and unique solutions in the areas of construction, technology and furniture construction, TABBERT ensures a pleasant room climate at all times.

SAFETY FROM A TO Z

130

All TABBERT caravans are equipped with technical features that contribute to safety both during the trip as well as at the holiday destination.

LONGEVITY ACROSS GENERATIONS

134

High-quality materials, state-of-the-art production techniques, and conscientious quality processes make a significant contribution to the lasting value of our caravans.

STYLISH HOLIDAY MOMENTS

When designing a TABBERT, we attach great importance to an attractive appearance. However, it is only perfect when all the wonderful features in our caravans have been perfectly integrated and their quality verified. With a keen sense of trends and our customers' lifestyles, we rethink every detail. Because we know that good design is crucial to your holiday happiness and you will thoroughly enjoy finally owning your new TABBERT.

BRIGHTENING IDEAS IMPLEMENTED IN AN ILLUMINATING WAY

Bright, dark, radiant or dimmed – the lighting concept of TABBERT Caravans offers various possibilities to influence the ambience and the personal mood. Both indirect and direct lighting applications help to put everything in the right light, both inside and out.

FURTHER VALUABLE INFORMATION
REGARDING DESIGN:
www.tabbert.com/design

The atmospheric LED ambient lighting will be further developed in the 2020 model year through light strips integrated into the furniture fronts (depending on model).

The mirror cabinet of the new PUCCINI with its backlit side surfaces gives a brilliant impression.

A faceted light ceiling and gently shimmering LEDs under the mirror cabinet increase the wellness factor in the CELLINI bathroom.

The canopy in the PUCCINI kitchen enters into a style symbiosis with the characteristic PUCCINI lighting.

Even details such as the LED reading spots combine TABBERT lighting design with proven customer benefits.

SPACE FOR WORLD EXPLORERS

The sense of space in a TABBERT sets new standards. Our interior concept uses open lines of sight to achieve freedom of movement on a level that is closer to that of a luxury apartment than a holiday home on wheels. In addition to their excellent use of storage space and optimum weight distribution, all TABBERT layouts are developed to provide an ambience that perfectly fulfils the aspirations of modern living. This is the maxim of our designers, engineers and master craftsmen. Hour by hour, day by day.

Thanks to open lines of sight, you experience an exceptional feeling of space.

Plenty of room to move thanks to the smart design of the interior layout.

LONG-LASTING SEATING AND RELAXING COMFORT

If you sit down with your friends in the seating area of a TABBERT, they may never want to leave. High-quality, durable and particularly ergonomic upholstered furniture with high backrests provide ultimate seating comfort **2**. On cold days, a well-ventilated winter backrest prevents you from feeling chilly while sitting next to the windows **1**. If you then pull the middle seat of the round seating group forward, you will also feel like at home on the sofa **3**.

THE BEST SLEEP FOR BIG DREAMS

Many people only sleep really well when they are lying in their own bed at home. So that the bed in your mobile home conveys exactly this feeling to you, we build our TABBERT models in a variety of layouts. Wide single beds, generous double beds, and cosy queen-sized beds – find the TABBERT that fits your personal sleeping habits and needs perfectly.

THE TABBERT COMFORT SLEEPING SYSTEM

Those for whom the high-quality TABBERT sleeping system is not enough will be delighted with the optional TABBERT comfort sleeping system. Just take care that you don't sleep through your entire holiday.

Load distribution due to
moving disk-springs

Cold-foam mattress with water gel layer

ADVANTAGES OF BED FRAMES WITH DISK-SPRINGS

- High point-elastic sleeping area (in 2 levels)
- Very low contact area between disk-spring bed frame and mattress
- Excellent ventilation of the sleeping system, excellent humidity management
- Individual 5-step headrest adjustment
- Laminated wood frame offers exceptional rigidity
- All wood components comply with the E1 standard (low formaldehyde/free of heavy metals)

ADVANTAGES OF A COLD-FOAM MATTRESS WITH WATER GEL LAYER

- Premium quality cold-foam mattress with cosy water gel layer for a relaxing night's sleep
- Pleasant cooling feeling during the fall-asleep phase and perfect temperature balance at night
- High-degree of point elasticity and optimal moisture regulation due to open-cell structure
- About 30% lighter than standard foam mattresses
- Removable jersey cover with 4-side zipper and washable up to 60°C (do not tumble-dry)

ROOM FOR ADVENTURE

Kitchen utensils and ingredients are readily available thanks to the deep pull-out, roller-bearing mounted TABBERT kitchen drawers.

Here, you will find plenty of space for frequently used items: the upper compartments are equipped with adjustable shelves, which allows them to fit large items.

It goes without saying – you will wish for nothing while holidaying in a TABBERT caravan. Here all the passengers can pack what is important to them in their mobile holiday home. The design systematically exploits every bit of free space by turning it into easily accessible storage space. The fact that this is done in the heated area is a significant advantage, and not just on winter camping trips.

The full-size, deep wardrobe allows crease-free storage of clothing on hangers.

Large items such as bedding are easily stored in the seat compartments.

The lower bunk bed can be folded up in just one step to create a large loading area that is also easily accessible from the outside via the garage door (optional).

The storage space below the bed is easily accessible – a rugged mechanism with a hold function and a gas pressure damper make handling child's play.

Storage space for bulky items: The high service flap in the bed area allows large items of luggage to be loaded easily and conveniently.

The cavernous front storage space can house more than just gas bottles and is exceptionally easy to load and unload.

Thanks to the ultrafiltration membrane in the handy water filter cartridges, 99.9999% of germs and microorganisms are removed from the water without the use of chemical additives.

The new water filter cartridges supplied as standard are simply attached to specially designed plug connections between the water tank and the pipe system and can be kept for up to six months after activation.

If a cartridge has exceeded its service life and there is no replacement cartridge available, the system can be bridged with an intermediate piece to ensure a constant supply of water.

CLEAN WATER? CLEARLY!

As an established premium brand, at TABBERT we are particularly committed to one tradition: Innovation. Our latest coup is the BWT BESTCAMP high-performance water filter system integrated as a standard feature in every TABBERT beginning in 2020. Even in Europe, clean and hygienically perfect water is anything but a matter of course. Especially when it comes from a tank in which it may have been stored for a long period of time. Without any chemical additives, the new system prevents dirt particles and microorganisms in the fresh-water tank from entering your caravan's water pipes. Replaceable ultrafiltration membrane filter cartridges allow you to enjoy up to six months of pure, clear water from on-board taps.

PIONEER

FROM THE BEGINNING

For 65 years now, our developers and designers have been overcoming small hurdles as well as previously unalterable boundaries to make your travels with our caravans as safe, comfortable and stylish as possible. Much of what is standard today was conceived in our think tank. Some outstanding TABBERT features, however, remain unmatched. Because we are still the only German caravan manufacturer with a slide-out model. Also the patented TABBERT roof was, and is, incomparable.

PATENTED TABBERT ROOF | GPS-LOCATION |
 OPEN LINES OF SIGHT | 3,5 T CHASSIS | AL-KO AAA PREMIUM BRAKE |
 AL-KO TRAILER CONTROL | BWT WATER FILTER | ILLUMINATED
 ENTRY LEVEL | COUPÉ ENTRY | SMART CARAVAN INTERFACE |

 DA VINCI CORNER KITCHEN | DOUBLE FLOOR WITH UNDERFLOOR
 SHELLS FOR ON-BOARD TECHNOLOGY | FLAP WITH WEATHER-
 PROTECTED LOCK AND REVOLVING LOGO | REAR GARAGE

MORE BEAUTIFUL LIVING

THANKS TO PIONEERING SPIRIT AND EXPERTISE

A generous sense of space and tasteful furnishings that suit the lifestyle of our customers – this is also typical of TABBERT. This includes the concept of open lines of sight as well as the bunk beds of the ROSSINI that can be converted into a seating group. We were the first to offer an L-shaped kitchen in some caravans as well as the first to patent a complete layout. The VIVALDI and PUCCINI refrigerator with double opening, accessible from the inside and the outside, is also an innovative attribute: First by TABBERT.

CLEVER AND SMART – STATE-OF-THE-ART

It is often the supposedly small things that represent the greatest innovations in everyday life – especially in the digital age. That's why we are constantly looking at the latest technical possibilities and state-of-the-art material components in order to develop realistic ideas for our caravans. It goes without saying that we regularly look outside the box and are therefore always the first to market. With our standard GPS tracking system, for example, or the new Smart Home voice control in the CELLINI, we were inspired by technologies from other industries.

SMART CARAVAN

We are the first German caravan manufacturer to offer Smart Home fans the possibility to operate selected CELLINI on-board technology via an interface. Among other things, the lighting, heating and air conditioning can be controlled. This is made possible by a single-board computer that is operated via a web interface. By integrating your Wi-Fi hotspot, you can also use well-known language assistants such as Alexa and Siri. For example, if you want to know how much fresh-water is left in your tank, simply talk to your CELLINI. For detailed information, please refer to our price list and technical documentation.

GPS TRACKER

Using the GPS tracking system introduced in 2019, you can locate your TABBERT at any time. Thanks to the app belonging to the system, you can receive status and location signals on your mobile phone at any time and receive an immediate message if your TABBERT is moved.

FRESH IDEAS FOR A GOOD ATMOSPHERE

A pleasant climate should prevail not only at your holiday location, but also in your caravan. For this reason, a TABBERT is constructed so that you can enjoy optimum temperatures in your home-away-from-home throughout the year.

The patented TABBERT roof (fitted as standard from the DA VINCI on) guarantees air circulation, optimum temperature insulation and 9dB of sound insulation (1.5 times quieter).

In the sleeping area, the winter backrest at the side wall and in the head area conducts the air rising from the rear ventilation upwards.

The standard Truma iNet system installed in many of our models enables temperature control via smartphone app. The gas level can also be viewed remotely on request.

Climate systems

Gas supply

Heating systems

The rear-ventilated wall units and seat stowage boxes guarantee constant air circulation, preventing the formation of condensation water and ensuring a uniform room climate.

Warm in winter, cool in summer thanks to well insulated Seitz windows with double glazing.

ADDITIONAL TABBERT CLIMATE HIGHLIGHTS

- + In caravans with a body length of 550 cm and greater, the temperatures in the living and sleeping area can be steplessly and separately regulated by a 2-climate-zone 12 V blower.

A WELL BALANCED HOLIDAY CLIMATE

The rear-ventilated front storage box with air nozzles in the window sill eliminates thermal bridges at the front window and prevents unwanted condensation (from the VIVALDI on).

High backrests provide optimum protection against winter cold, allow optimum circulation of warm air and prevent condensed moisture. In this way, a uniform and healthy interior climate is guaranteed.

TABBERT interiors are heated by powerful, centrally located gas heaters with circulating air. Depending on the layout and body length, the Truma S 3004 or S 5004 are standard equipment. VIVALDI, PUCINI and CELLINI models use Truma Combi 6 heaters with iNet and integrated water heater. In the CELLINI slide-out, an additional Truma gas heater provides cosy warmth in the open bath.

The heating hoses are precisely adjusted with clamps and perforated so that the warm air radiation is distributed specifically into the room. The water pipes are laid directly above to protect them from freezing.

Those who prefer a heating system based on hot water can equip their TABBERT optionally with an Alde heating system. As with the standard circulating air heating system, the water pipes are routed along the heating pipes to prevent freezing.

The 47 mm thick, well-insulated floor guarantees warm feet. Starting from the DA VINCI series, additional underfloor heating provides a special feeling of well-being (optional on some models).

Although the weather still cannot be determined at the push of a button, an optimal climate in the caravan can be controlled – if the caravan is built for it. Thanks to the superior, multi-layer insulation of the roof, walls and floors, the interior of a TABBERT heats up a third faster than that of conventionally built caravans. This is, of course, also due to the high-quality Truma heating technology and the well thought-out installation of the heating hoses. Conversely, the high-quality TABBERT insulation technology ensures that you keep a cool head even on hot summer days.

HEAT-UP FROM -15 °C TO +20 °C IN MINUTES

ADDITIONAL TABBERT CLIMATE HIGHLIGHTS

- + The 31 mm thick side walls, the TABBERT roof and the 47 mm thick frost protection floor.
- + Perfectly sealed windows and doors ensure a draught-free interior.
- + All outside windows can be fitted with optional insulation mats attached to the awning strips to reduce thermal bridges. Even the front and rear windows can be fitted on request.

EVERYTHING SECURE? OF COURSE!

If you want to play it safe, you are in the right place: TABBERT provides its caravans with excellent protection against unpleasant situations. For many years now, virtually no other brand has demonstrated more comprehensive safety precautions. This traditional strength sets all our current series apart. Also in construction.

Danger detected, danger averted – the live-saving and standard-fit smoke detector warns of the risk of fire in good time.

The TABBERT window lock is twice as secure. It can only be opened if the additional push-button is pressed.

The new gas pressure regulators from Truma are even more compact than before and weigh less. Thanks to integrated crash sensors, the gas supply is interrupted immediately in the event of a collision, so that you can also supply your refrigerator with energy while driving. Additional Truma gas filters with replaceable filter pads protect the gas system from contamination.

Cutlery and glasses are well protected in the kitchen drawers and ceiling-mounted lockers – thanks to the self-closing safety locks.

Simple but effective. This protective feature prevents damage to the rear of the caravan if it is tilted unexpectedly.

The tried-and-tested two-part TABBERT door with three-point locking system simultaneously meets the need for more safety, light and ventilation (ROSSINI, DA VINCI and PEP). Just as nice as it is lock-secure, the new one-part entrance door is equipped with a robust one-handed inner handle (from VIVALDI).

The almost noiseless pull-out mosquito net door disappears entirely within the door frame in the new TABBERT models, without narrowing off the exit.

The sturdy heavy-duty struts guarantee a secure footing free of vibrations (AL-KO Big Foot optional).

DRIVING SAFETY WITHOUT COMPROMISES

TABBERT stands for safety and has received numerous awards for this in the past. And with good reason. All TABBERT caravans offer uncompromising and comprehensive levels of safety equipment. This means you are also equipped to deal with unpredictable situations. With its standard upgrades in driving and vehicle safety, TABBERT sets the standards for the industry.

Rear lights featuring the fibre optic system and the TABBERT automotive design are not only attractive, but safe.

The attention-grabbing clearance, rear- and side- lights provide enhanced safety for nighttime driving and make it easier to manoeuvre in the dark.

AL-KO CHASSIS FOR HANDLING DYNAMICS AND SAFETY

Superlative braking effect even without continuous brake inspection: The AL-KO AAA premium brake is self-adjusting – and reduces braking distances by up to five metres.

High-quality branded tires with high load-bearing reserves ensure optimum handling characteristics, even with a full load.

Excellent driving safety is guaranteed by the electro-mechanical anti-skid system ATC (AL-KO Trailer Control) which continuously monitors all driving states with the help of ball-bearing-mounted sensors. If critical signals are detected, immediate brake intervention is triggered.

A safe, relaxed driving experience at all times: in the event of side winds and during overtaking or evasive manoeuvres, the AL-KO Trailer Control system equipped with sensors brings the caravan back on track automatically.

The AKS anti-sway hitch swiftly balances out any rolling and pitching movements.

In all TABBERT models, a weighing device is installed in the support wheel. This is where you can simply check if your TABBERT is loaded in accordance with your towing vehicle (not possible for the 3.5 tonne chassis).

STRONGER THAN TIME

A TABBERT caravan stands for enduring quality. This high level of commitment is reflected in every detail. Our systematic quality philosophy extends throughout the production process. From intelligent design, to the selection of the high-quality material mix all the way to the flawless workmanship. TABBERT – the brand for those who value durability and lasting value.

For caravans made by TABBERT, we grant you a 10-year leak-proofness guarantee on the body manufactured by us in addition to your compulsory guarantee within the framework of our guarantee conditions.

TABBERT 58 MM ROOF STRUCTURE

Reduces insurance premiums and increases the long-term value: The 1.4 millimetre thick high strength GRP roof over the thick, rear-ventilated insulation.

The ceiling-mounted cupboards not only look attractive, but also feature sturdy bases with reinforcing elements and wooden mouldings.

Visibly flawless workmanship, flush surfaces and narrow gaps on three-dimensional structural elements leave a lasting impression.

Breathable reinforcement mouldings made of thick solid wood used in the interior fittings guarantee unyielding rigidity.

Top-quality hinges for ceiling-mounted cupboard doors and prepared adjustment options for reinforcing intermediate shelves are a matter of course.

TOP VALUE TECHNOLOGY (TVT)

Optimised layer by layer: Where it makes sense, the optional Top Value Technology (TVT) from TABBERT does not use any wood in roofs, floors and walls. The sandwich construction made of aluminium and various high-quality plastic and glass-fibre layers to reinforce the caravan make it more robust, weather-resistant, and thus significantly more durable. The high-strength GRP roof provides reliable protection against rain, snow and hail.

It runs quietly and closes safely – the sturdy wooden sliding door with its silent, adjustable internal castors (from the VIVALDI on, depending on layout).

The superlative quality of the precision work is also especially evident in inaccessible areas that are out of sight.

Safe technology attractively presented: The economical 12 V LED lighting strips are protected against accidental contact, short circuits and corrosion.

THE LEGEND TABBERT

When master bodywork builder Alfred Tabbert presented his first caravan to the public in 1953, he struck a chord with an entire generation. The years of the 'economic miracle' in Germany ushered in elegance, chic and a new self-confidence that TABBERT skilfully conveyed in his exterior and interior designs.

People wanted to – and could – afford to indulge themselves. "La Dolce Vita" captured the hearts of an entire nation. Europe wanted to travel and enjoy life to the full. TABBERT designed the products to enable this – products that stood out with their unique mix of materials, stylish interiors, high-quality workmanship and practical design solutions. And so it remains today.

TABBERT CUSTOMERS ENJOY PREMIUM STATUS

Whether on the street, the campsite, as a fan community or on the Internet – TABBERT increases the brand-experience factor. We support your hobby and inform you about the brand and our vehicles. We also entertain you with general news, reports and personal stories about caravanning.

OPTIONAL BEDS

The information on the delivery contents, measurements and weights as well as the appearance correspond to the knowledge at the time of printing (08/2019). We reserve the right to make changes on equipment, technical data, serial equipment and prices. After a contract has been concluded, we reserve the right to make technical changes within the framework of the construction insofar as they serve technical progress and are acceptable for the customer. Minor colour and texture deviations are also reserved – even after conclusion of the contract – insofar as these cannot be avoided due to the material (e.g. colour deviations of up to approx. 2.0 dE between paint on sheet metal and paint on GRP/plastic) and are reasonable for the customer. Some of the illustrations show optional equipment that is available at an extra charge or equipment features of prototypes/studies that do not conform to the serial status and in some cases will not be available as optional equipment. Colour deviations are print-technically possible. Therefore, before purchasing a vehicle, please seek comprehensive advice on the current status of the series from an authorised dealer. The decoration shown in the catalogue is not part of the equipment supplied. Please also note the comments in the current price list, in particular on weights, payload options and tolerances. Reprinting, even in extracts, is only permitted with the prior written permission of Knaus Tabbert GmbH. We reserve the right to change content at our discretion.
